Security Features

Hologram Foil

Multicoloured reflective marker is fused to each cheque. Can not be reproduced by colour copiers.

True Watermark

Pattern is visible from both sides when held up to light. Provides instant authentication.

Toner Adhesion

Fuses toner on paper surface. Makes it difficult to change data by scraping or using tape.

Invisible Fibers

Fibers are built into the paper. Visible under UV light and are a useful authentication tool.

Micro Print

Lines appear broken to the human eye. When scanned or copied they will often blur.

Security Warning

Detailed list helps verify security features. Serves as a potential deterrent to criminals.

Chain of Security

Manufactured and stored in secure facilities, sold and distributed to authorized printers.

Thermochromic Ink

Upon touch or breath, the ink becomes temporarily invisible, providing instant authentication.

Polar Reaction (blue stain)

Non-Polar Reaction (purple/blue stain)

Oxidant Reaction (light yellow stain)

Acid Reaction (pink stain)

Base Reaction (turquoise stain)
