

PG TAPS

Taylor Tool manufactures PG (Steel Conduit Taps) to Din 40430 thread form tap dimensions. Pg Taps are an 80° thread form (40° per side) and are made with USCTI table 302 tap blanks.

Taylor Tool manufactures and stocks PG taps with a bottoming tap chamfer (1 to 2 threads) and plug tap chamfer (3 to 5 threads). Other special PG tap requirements can be provided to our customers such as spiral point PG taps and spiral flute PG taps with different chamfer angles.

PG Steel Conduit Taps per Din 40430

80° Metric Electric Thread Form

Thread Type and Size	Outside Diameter	Threads per inch	Recommended drill size
